

CAE is a homegrown Canadian training solution and services company headquartered in Montreal. We have a comprehensive global presence of over 9,000 employees – 4,500 of which call Canada home – and 160+ training sites in over 35 countries. Each year, we train more than 220,000 civil and defence crewmembers, including 135,000 pilots, and thousands of healthcare professionals worldwide.

CAE Canada employees are deployed from coast to coast at 15 different sites to support the Canadian Forces. As the world's most focused and experienced training systems integrator and operational in-service support provider for Air, Naval and Land customers, CAE is dedicated to delivering the most comprehensive and highest quality solutions to help our customers enhance safety, efficiency and mission readiness.

From academic and simulation-based training to an integrated live-virtual-constructive (iLVC) training environment, CAE addresses the full training continuum, including designing and delivering innovative training centres for comprehensive training. We are also committed to maintaining mission readiness through operational in-service support solutions for the Royal Canadian Air Force, Royal Canadian Navy and Canadian Army.

CAE is one of Canada's leading innovators and continually invests in research and development to ensure we offer leading-edge simulation technologies and training services to our customers in Canada and globally. Over the next five years, CAE has committed to investing \$1 billion in innovation to stay at the forefront of the training industry. Our Project Digital Intelligence R&D program includes support from the Government of Canada and the Government of Quebec through the strategic innovation fund to harness the power of artificial intelligence, cloud computing, big data, and augmented and virtual reality to develop the next generation of simulation and training products.
