

What is the Canadian Industrial Leadership Award (CILA)?

Seize the Opportunity!

Together, [L3Harris Canada](#), [CAE Canada](#) and [Thales Canada](#) are working to increase employment, development and advancement opportunities for Canadian women in the defence and security sectors. In 2020, we will be awarding ten women enrolled in STEM programs at Universities and Colleges across Canada with a fully paid internship, executive mentorship, a one-time \$6000 bursary* and the opportunity for full-time employment after successful completion of their program.

During their paid internship, each award recipient will participate in cross-company learning activities and exciting project challenges to meet their academic requirements and develop their skillset.

What makes this Award different?

- CILA provides more than just financial support. It's an opportunity to contribute to a leading defence and security company in a meaningful way and kick-start your career in a STEM-related field.
- CILA is a full leadership experience that complements academic and career interests by providing exposure to company projects involved in each award recipient's area of expertise at the cutting edge of technology and innovation.
- CILA offers collaborative opportunities to network and share best practices.
- Recipients will work with the nine other award winners across the country to learn more about STEM opportunities within the defence and security sectors.
- CILA award recipients will receive mentorship from senior industry executives and advisors who align with specific projects that support their education.

What are you waiting for?

Visit CILAaward.ca to find out how L3Harris, CAE and Thales Canada are committed to developing future industry leaders like you! Participating schools, selection criteria, eligibility details and important deadlines are all available on the website.

Students can apply for this opportunity directly through their school's co-op job board and/or career portal.

*Awarded after successful completion of the co-op/internship
