

In the Marine sector, in Canada and around the world, Babcock's teams safely and efficiently support complex and critical assets on a large scale. Babcock ensures that their customers benefit from increased asset availability, improved efficiency and significantly reduced operating costs.

Babcock's Canadian team is proud to be trusted to deliver key naval in-service support for the Royal Canadian Navy. Since 2008, they have been providing platform design, integration, configuration, management services, and maintenance and waterfront support, ensuring complete lifecycle engineering support for Canada's fleet of Victoria-Class submarines.

In the Aviation sector, Babcock ensures that the aircrew trainees of their partner nations receive the world's best flying training. Babcock has over 1,300 pilots and work with air forces, navies, and armies to deliver world-class technical instruction across multiple locations and aircraft types.

Babcock Leonardo Canadian Aircrew Training, a partnership between Babcock Canada and Leonardo Canada, is pursuing Canada's Future Aircrew Training (FAcT) Program. FAcT is Canada's next-generation military pilot and aircrew training program. With 70+ years of global aircrew training experience, 100+ years in military aviation and existing ties to Canada's military, Babcock Leonardo Canadian Aircrew Training and its partners are the first-in-class choice to ensure the Royal Canadian Air Force excels at home and abroad.

In Canada, Babcock is proud to have been selected by the Government of Manitoba to deliver vital wildfire suppression services, as well as key components of critical air ambulance services. Babcock is working to protect communities and natural resources.

Cavendish Nuclear operates within the nuclear energy sector and is a business unit of Babcock Canada. Cavendish Nuclear operates across the entire nuclear cycle; from new build and nuclear operations and services – to decommissioning and waste management. Babcock operates at all tiers – from site license holders and managers – to major project delivery – to specialized engineering consulting services.
